

Monoclonal Anti-Guinea Pig Interleukin-1 Beta Peptide, Clone GP29.4G5.11F (produced *in vitro*)

Catalog No. NR-49583

For research use only. Not for human use.

Contributor and Manufacturer:

Jean Mukherjee, D.V.M., Ph.D., Assistant Professor, Department of Infectious Disease and Global Health, Cummings School of Veterinary Medicine, Tufts University, North Grafton, Massachusetts, USA

Manufacturing Date:

October 7, 2014

Product Description:

Antibody Class: IgG1κ
 Mouse monoclonal antibody prepared against a 14 amino acid peptide of guinea pig interleukin-1 (IL-1) beta was purified from clone GP29.4G5.11F murine hybridoma supernatant by affinity chromatography. The IL-1 beta peptide antigen, GPNKNQYCFQDRDL, with added C-terminal cysteine is conjugated to keyhole limpet hemocyanin.¹ The B cell hybridoma was generated by the fusion of NS0 myeloma cells with immunized mouse splenocytes.¹

Material Provided:

Each vial contains approximately 100 µL of purified monoclonal antibody in 10 mM PBS (pH 7.4) at a concentration of 1 mg per mL.

Packaging/Storage:

NR-49583 was packaged aseptically in screw-capped plastic cryovials and is provided frozen on dry ice. The item should be stored at -20°C or colder immediately upon arrival. Freeze-thaw cycles should be avoided.

Functional Activity:

NR-49583 is reactive in ELISA using unconjugated peptide. NR-49583 is reactive in western blots using native protein extract from guinea pig tissues but not reactive using unconjugated peptide.¹

Citation:

Acknowledgment for publications should read “The following reagent was obtained through BEI Resources, NIAID, NIH: Monoclonal Anti-Guinea Pig Interleukin 1 Beta Peptide, Clone GP29.4G5.11F (produced *in vitro*), NR-49583.”

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and

Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 5th ed. Washington, DC: U.S. Government Printing Office, 2009; see www.cdc.gov/biosafety/publications/bmbl5/index.htm.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.
