

# **Product Information Sheet for NR-452**

# Porcine Transmissible Gastroenteritis Virus (TGEV), Purdue (attenuated), Chemically Inactivated

## Catalog No. NR-452

## For research use only. Not for human use.

#### **Contributor:**

Linda J. Saif, Ph.D., Food Animal Health Research Program, Ohio Agricultural Research and Development Center, Department of Veterinary Preventive Medicine, College of Veterinary Medicine, The Ohio State University, Wooster, Ohio

#### **Product Description:**

Virus Classification: Nidovirales, Coronaviridae,

Coronavirus, Group 1

Agent: Porcine transmissible gastroenteritis virus (TGEV),

chemically inactivated Strain: Purdue (attenuated)

Original Source: Small intestinal contents of a young pig

with diarrhea, vomiting, and dehydration

<u>Comments</u>: The virus was propagated in primary porcine kidney (PPK) cells for 115 passages and then in swine testicular (ST) cells for more than 6 passages.

#### **Material Provided:**

Each vial contains approximately 1 mL of cell lysate and supernatant from ST cells infected with the Purdue (attenuated) strain of porcine TGEV. The suspension of cell lysate and supernatant was treated with binary ethyleneimine to inactivate the virus.

#### Packaging/Storage:

NR-452 was packaged aseptically in screw-capped plastic cryovials. The product is provided frozen and should be stored at -60°C or colder immediately upon arrival. Freezethaw cycles should be avoided.

#### **Growth Conditions Prior to Inactivation:**

Host: ST cells

Growth Medium: Minimum Essential Medium containing Earle's salts, L-glutamine and sodium bicarbonate (supplemented with 1% nonessential amino acids and 1% antibiotics)

Infection: 18 to 24 hours Incubation: 4 to 5 days at 37°C

Cytopathic Effect: Fused, rounded cells, diffuse cytoplasmic

vacuolation

Alternate Host: PPK cells1

Note: Porcine TGEV is sensitive to ultraviolet light, high

temperature and strong mechanical agitation.

#### Citation:

Acknowledgment for publications should read "The following reagent was obtained through the NIH Biodefense and Emerging Infections Research Resources Repository, NIAID, NIH: Porcine Transmissible Gastroenteritis Virus (TGEV), Purdue (attenuated), Chemically Inactivated, NR-452."

#### Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 4th ed. Washington, DC: U.S. Government Printing Office, 1999. HHS Publication No. (CDC) 93-8395. #### Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government make any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

#### **Use Restrictions:**

This material is distributed for internal research, non-commercial purposes only. This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to negotiate a license. U.S. Government contractors may need a license before first commercial sale.
