

## Streptococcus agalactiae, Strain SGBS021

Catalog No. NR-44138

**For research use only. Not for human use.**

### Contributor:

Carol J. Baker, M.D., Professor, Department of Pediatrics, Section of Infectious Diseases, Baylor College of Medicine, Houston, Texas, USA

### Manufacturer:

BEI Resources

### Product Description:

**Bacteria Classification:** Streptococcaceae, Streptococcus

**Species:** Streptococcus agalactiae (also referred to as Streptococcus difficile)<sup>1</sup>

**Serogroup:** Group B<sup>2</sup>

**Strain:** SGBS021

**Original Source:** Streptococcus agalactiae (S. agalactiae), strain SGBS021 was isolated in 2007 from the blood of a bacteremia patient in Harris County, Texas, USA.<sup>2</sup>

**Comment:** The complete genome of S. agalactiae, strain SGBS021 has been sequenced (GenBank: [AUWC000000000](https://www.ncbi.nlm.nih.gov/nuccore/AUWC000000000)).

S. agalactiae is a Gram-positive cocci characterized by the presence of Group B Lancefield antigen, and is known as Group B Streptococcus (GBS). GBS causes illness in people of all ages. In newborns, GBS most commonly causes sepsis (infection of the blood), pneumonia (infection in the lungs), and sometimes meningitis (infection of the fluid and lining around the brain). The most common problems caused by GBS in adults are bloodstream infections, pneumonia, skin and soft-tissue infections, and bone and joint infections. In addition to the presence of the Group B Lancefield antigen, GBS is also characterized by its ability to hydrolyze sodium hippurate and sensitivity to bile. S. agalactiae's polysaccharide antiphagocytic capsule is its main virulence factor.<sup>3</sup> Genomes from multiple serotypes have been sequenced for comparative analyses.<sup>4</sup>

### Material Provided:

Each vial contains approximately 0.5 mL of bacterial culture in Todd-Hewitt broth with 10% glycerol.

**Note:** If homogeneity is required for your intended use, please purify prior to initiating work.

### Packaging/Storage:

NR-44138 was packaged aseptically in cryovials. The product is provided frozen and should be stored at -60°C or colder immediately upon arrival. For long-term storage, the vapor phase of a liquid nitrogen freezer is recommended. Freeze-thaw cycles should be avoided.

### Growth Conditions:

#### Media:

Tryptic Soy broth or Todd-Hewitt broth or equivalent  
Tryptic Soy agar or Tryptic Soy agar with 5% defibrinated sheep blood or Todd-Hewitt agar or equivalent

#### Incubation:

Temperature: 37°C

Atmosphere: Aerobic with 5% CO<sub>2</sub>

#### Propagation:

1. Keep vial frozen until ready for use, then thaw.
2. Transfer the entire thawed aliquot into a single tube of broth.
3. Use several drops of the suspension to inoculate an agar slant and/or plate.
4. Incubate the tube, slant and/or plate at 37°C for 24 hours.

**Note:** Streptococcus species are generally fast growers. To avoid overgrowth of the culture, incubation without shaking is recommended for growth in broth.

### Citation:

Acknowledgment for publications should read "The following reagent was obtained through BEI Resources, NIAID, NIH: Streptococcus agalactiae, Strain SGBS021, NR-44138."

### Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 5th ed. Washington, DC: U.S. Government Printing Office, 2009; see [www.cdc.gov/biosafety/publications/bmbl5/index.htm](http://www.cdc.gov/biosafety/publications/bmbl5/index.htm).

### Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at [www.beiresources.org](http://www.beiresources.org).

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy.
