

Product Information Sheet for HM-480

***Stomatobaculum longum* (Deposited as *Lachnospiraceae* sp.), Strain ACC2**

Catalog No. HM-480

For research use only. Not for human use.

Contributor:

Maria V. Sizova, Ph.D., Department of Biology, Northeastern University, Boston, Massachusetts

Manufacturer:

BEI Resources

Product Description:

Bacteria Classification: *Lachnospiraceae*, *Stomatobaculum*

Species: *Stomatobaculum longum* (HM-480 was deposited as *Lachnospiraceae* sp., however this organism has been reclassified as *Stomatobaculum longum*.)

Strain: ACC2

Original Source: *Stomatobaculum longum* (*S. longum*), strain ACC2 was isolated in March 2010 from the subgingival plaque of a 25-year-old black female.¹

Comments: *S. longum*, strain ACC2 (HMP ID 9623) is a reference genome for The Human Microbiome Project (HMP). HMP is an initiative to identify and characterize human microbial flora. The complete genome of *S. longum*, strain ACC2 was sequenced at the Broad Institute (GenBank: AGEL00000000).

Note: HMP material is taxonomically classified by the depositor. Quality control of these materials is only performed to demonstrate that the material distributed by BEI Resources is identical to the deposited material.

S. longum is a strictly anaerobic, non-spore-forming, non-motile, rod-shaped bacterium. This organism stains Gram-variable but is structurally Gram-positive. *S. longum* is a novel genus and species combination isolated from the oral cavity. *S. longum*, strain ACC2 is the type strain.²

Material Provided:

Each vial contains approximately 0.5 mL of bacterial culture in Trypticase-Yeast Extract medium supplemented with 10% glycerol.

Note: If homogeneity is required for your intended use, please purify prior to initiating work.

Packaging/Storage:

HM-480 was packaged aseptically in cryovials. The product is provided frozen and should be stored at -60°C or colder immediately upon arrival. For long-term storage, the vapor phase of a liquid nitrogen freezer is recommended. Freeze-thaw cycles should be avoided.

Growth Conditions:

Media:

Reinforced Clostridial broth or Trypticase-Yeast Extract broth³ or equivalent

Reinforced Clostridial agar or Tryptic Soy agar with 5% sheep blood or equivalent

Incubation:

Temperature: 37°C

Atmosphere: Anaerobic

Propagation:

1. Keep vial frozen until ready for use, then thaw.
2. Transfer the entire thawed aliquot into a single tube of broth.
3. Use several drops of the suspension to inoculate an agar slant and/or plate.
4. Incubate the tube, slant and/or plate at 37°C for 2 to 3 days.

Note: HM-480 does not grow well on agar.

Citation:

Acknowledgment for publications should read "The following reagent was obtained through BEI Resources, NIAID, NIH as part of the Human Microbiome Project: *Stomatobaculum longum* (Deposited as *Lachnospiraceae* sp.), Strain ACC2, HM-480D."

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. *Biosafety in Microbiological and Biomedical Laboratories*. 5th ed. Washington, DC: U.S. Government Printing Office, 2009; see www.cdc.gov/biosafety/publications/bmbl5/index.htm.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

Use Restrictions:

This material is distributed for internal research, non-commercial purposes only. This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale.
