### DATA SHEET

**Reagent:** ☒ HIV-1 NKU3006

**Catalog Number:** 11267

**Lot Number:** 098352

**Release Category:** C

**Provided:** 1 vial cell-free virus,  $1.12 \times 10^3$  TCID<sub>50</sub>/mL, p24= 75 ng/mL.

**Host Strain:** Human PBMCs

**Description:** The International Panel of HIV-1 virus isolates representing six major globally prevalent strains of genetically and biologically characterized HIV-1 isolates (Brown, BK et al, *J Virology* **79**(10): 6089, 2005) consists of ten viruses each from chronically infected individuals of clades A, B, C, D and circulating recombinant forms, CRF01\_AE and CRF02\_AG. The panel consists of 49 nonsyncytium-inducing virus isolates that use CCR5 as a major coreceptor and 11 syncytium-inducing isolates that use only CXCR4 or both co-receptors, and contains both neutralization-sensitive and resistant isolates. This collection provides an important resource for standardization of immunogenicity assessment in HIV-1 vaccine trials (see Table 1 for genetic and biological characterization of the 60 international HIV-1 isolates).

**This isolate is available individually, or as part of the HIV-1 60 International Isolate Panel (Cat #11412).**

[Table I. HIV-1 International Panel of HIV-1 Isolates.](#)

**Special Characteristics:** Clade/CRF: D  
Syncytium Induction: NSI  
Coreceptor: R5  
  
GenBank Accession No. [AF475090](#)

**Recommended Storage:** Liquid nitrogen
