### DATA SHEET

**Reagent:** ☒ HIV-1 NP1695 (97TH\_NP1695) Virus

**Catalog Number:** 11275

**Lot Number:** 100065

**Release Category:** C

**Provided:** 1 mL cell-free virus,  $4 \times 10^3$  TCID<sub>50</sub>/mL, 95 ng/mL p24.

**Host Strain:** Human PBMCs.

**Propagation:** Propagated in PHA-stimulated PBMC, followed by incubation in IL-2 containing medium.

**Sterility:** Negative for mycoplasma, bacteria and fungi.

**Description:** The International Panel of HIV-1 virus isolates representing six major globally prevalent strains of genetically and biologically characterized HIV-1 isolates (Brown, BK et al, *J Virology* **79**(10): 6089, 2005) consists of ten viruses each from chronically infected individuals of clades A, B, C, D and circulating recombinant forms, CRF01\_AE and CRF02\_AG. The panel consists of 49 nonsyncytium-inducing virus isolates that use CCR5 as a major coreceptor and 11 syncytium-inducing isolates that use only CXCR4 or both co-receptors, and contains both neutralization-sensitive and resistant isolates. This collection provides an important resource for standardization of immunogenicity assessment in HIV-1 vaccine trials (see Table 1 for genetic and biological characterization of the 60 international HIV-1 isolates).

**This isolate is available individually, or as part of the HIV-1 60 International Isolate Panel (Cat #11412).**

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.

**Special Characteristics:** Clade/CRF: CRF01\_AE  
Syncytium Induction: SI  
Coreceptor: X4  
  
GenBank Accession No. [AY713419](#)

**Recommended Storage:** Liquid nitrogen

**Contributor:** Dr. Victoria Polonis
