DATA SHEET

Reagent: Normal Sheep Serum

Catalog Number: 315

Lot Number: 1 DV-014

Provided: 1 vial lyophilized protein.

Host or Host Site: Sheep.

Special Characteristics: Lyophilized polyclonal serum. The materials in the vials are free of bacterial contamination and contain NO preservatives. When reconstituted in 1.5 ml sterile distilled water, the sera are neat with respect to unprocessed.

Reference:
[Specification Sheet.](#)

Recipient must not use or incorporate the reagent for commercial purposes.

Recommended Storage: After reconstitution keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor: Dr. Michael Phelan.

References: Personal communication.

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: Normal Sheep Serum from Dr. Michael Phelan."

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
