### DATA SHEET

2 6/1/89

**Reagent:** vCF21

**Catalog Number:** 360

**Lot Number:**

**Provided:** 1 vial cell-free virus at  $2 \times 10^9$  infectious virions/ml.

**Host or Recommended Host or Host Cells:** HeLa and other vertebrate cells.

**Cloning Vector:** Vaccinia virus, strain WR.

**Description:** Plasmid clone pCF21 containing the HIV-1 HXB2 *pol* reverse transcriptase gene, *E. coli*  $\beta$ -galactosidase gene, and the vaccinia early/late P7.5 promoter was used to transfect CV-1 monkey kidney cells infected with wild-type vaccinia virus. The resultant recombinant vaccinia virus, vCF21, was isolated in the presence of X-Gal by selection for blue-colored virus plaques. The *pol* insert contains added initiation (just prior to the N-terminal proline of RT) and termination codons, and is regulated by the vaccinia virus P7.5 promoter.

**Special Characteristics:** Active reverse transcriptase (61 kD) is expressed.  
Cloning Site: Vaccinia virus thymidine kinase gene.

**Recommended Storage:** -70degreeC.

**Contributor:** Dr. Charles Flexner and Dr. Bernard Moss.

**References:** Flexner C, Broyles SS, Earl P, Chakrabarti S, Moss B. Characterization of human immunodeficiency virus gag/pol gene products expressed by recombinant vaccinia viruses. *Virology* **166**:339-349, 1988.

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.

**NOTE:**

Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: vCF21 from Dr. Charles Flexner and Dr. Bernard Moss." Also include the reference cited above in any publications.

**The US Government has submitted a patent application on this reagent.**

**Scientists at for-profit institutions or who intend commercial use of this reagent must contact Dr. Sally Hu at the NIH Office of Technology Transfer, Email: [hus@mail.nih.gov](mailto:hus@mail.nih.gov), Phone: 301-435-5606, before the reagent can be released. Please specify the name and a description of the intended use of the reagent.**

**The control vaccinia viruses to this clone are available as catalog #353 and catalog #357.**

**Last Updated:**

June 24, 2013
