### DATA SHEET

<b>Reagent:</b>	HIV-1 96ZM651 gp120 Recombinant Protein
<b>Catalog Number:</b>	10080
<b>Lot Number:</b>	120003
<b>Provided:</b>	50 µg at 0.5 mg/ml in phosphate buffered saline, pH 7.4.
<b>Purity:</b>	>90% as determined by SDS-PAGE.
<b>Description:</b>	An envelope protein derived from a subtype C virus.
<b>Special Characteristics:</b>	Positive reactivity on Western Blot using rabbit antibody to HIV-1 gp120. <a href="#">SDS-PAGE and Western Blot Analysis</a>
<b>Recommended Storage:</b>	-70°C
<b>Contributor:</b>	DAIDS, NIAID.
<b>NOTE:</b>	Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: HIV-196ZM651 gp120 from DAIDS, NIAID."
<b>Last Updated:</b>	November 16, 2016
