²The bacterial preparation used for extraction of genomic DNA was produced by Actinomyces Broth culture of the deposited material. After incubation for 48 hours at 37°C and anaerobic atmosphere (80% N₂:10% CO₂:10% H₂), genomic DNA was extracted using proprietary technology.

³7 days at 37°C and anaerobic atmosphere

⁴An extraction procedure was used that has been shown to consistently inactivate 100% of Gram-positive and Gram-negative bacteria.
