Product Information Sheet for NR-446

**Porcine Transmissible Gastroenteritis Virus, Purdue (attenuated)**

**Catalog No. NR-446**

For research use only. Not for human use.

NR-446 did not pass the BEI Resources quality control Mycoplasma Culture Test. Please see the Certificate of Analysis to determine whether or not this product is acceptable for your intended use.

**Contributor:** Linda J. Saif, Ph.D., Food Animal Health Research Program, Ohio Agricultural Research and Development Center, Department of Veterinary Preventive Medicine, College of Veterinary Medicine, The Ohio State University, Wooster, Ohio

**Product Description:**

**Virus Classification:** Coronaviridae, Coronavirus, Group 1

**Species:** Porcine transmissible gastroenteritis virus (TGEV)

**Strain:** Purdue (attenuated)

**Original Source:** Porcine TGEV, Purdue was isolated from the small intestinal contents of a young pig with diarrhea, vomiting, and dehydration.

**Comments:** The virus was propagated in primary porcine kidney (PPK) cells for 115 passages and then in swine testicular (ST) cells for more than 6 passages.

**Material Provided:** Each vial contains approximately 1 mL of cell lysate and supernatant from ST cells infected with the Purdue (attenuated) strain of porcine TGEV.

**Note:** If homogeneity is required for your intended use, please purify prior to initiating work.

**Packaging/Storage:**

NR-446 was packaged in screw-capped plastic cryovials. The product is provided frozen and should be stored at -70°C or colder immediately upon arrival. Freeze-thaw cycles should be avoided.

**Growth Conditions:**

**Host:** ST cells

**Growth Medium:** Minimum Essential Medium containing Earle's salts, L-glutamine and sodium bicarbonate (supplemented with 1% nonessential amino acids and 1% antibiotics)

**Incubation:** 16 to 20 hours at 37°C

**Cytopathic Effect:** Fused, rounded cells, diffuse cytoplasmic vacuolation

**Alternate Host:** PPK cells

**Note:** Porcine TGEV is sensitive to ultraviolet light, high temperature, and strong mechanical agitation.

**Citation:**

Acknowledgment for publications should read “The following reagent was obtained through the NIH Biodefense and Emerging Infections Research Resources Repository, NIAID, NIH: Porcine Transmissible Gastroenteritis Virus, Purdue (attenuated), NR-446.”

**Biosafety Level:** 2

**Disclaimers:**

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at [www.beiresources.org](http://www.beiresources.org).
