

***Yersinia pestis* F1-V Fusion Protein,
Recombinant from *Escherichia coli*****Catalog No. NR-4524****For research use only. Not for human use.****Contributor:**

Richard T. Kenney, M.D., Director of Clinical Research and Development and Medical Affairs, GlaxoSmithKline Biologicals, Columbia, Maryland

Product Description:

Yersinia pestis (*Y. pestis*) recombinant F1-V fusion protein was expressed in *Escherichia coli* and purified by conventional chromatography. Originally developed by the U.S. Army Medical Research Institute of Infectious Disease (USAMRIID), F1-V is a fusion protein consisting of the Fraction 1 (F1) capsular protein and the virulence-associated (V) regulatory protein from *Y. pestis* joined by a two amino acid linker (GenPept: AAY23169).^{1,2}

Material Provided:

Each vial contains approximately 4.2 mg of recombinant F1-V fusion protein in phosphate buffered saline (PBS).

Packaging/Storage:

NR-4524 was packaged in stoppered glass serum vials with a crimp seal. It is provided in solution at 2-8°C and should be stored at 2-8°C immediately upon arrival. Do not freeze.

Functional Activity:

NR-4524 was demonstrated to be functionally active based on its reactivity with F1-V specific antisera. Recombinant F1-V fusion protein is protective in a *Y. pestis* lethal challenge murine model.^{2,3}

Citation:

Acknowledgment for publications should read "The following reagent was obtained through the NIH Biodefense and Emerging Infections Research Resources Repository, NIAID, NIH: *Yersinia pestis* F1-V Fusion Protein, Recombinant from *Escherichia coli*, NR-4524."

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 5th ed. Washington, DC: U.S. Government Printing Office, 2007; see www.cdc.gov/od/ohs/biosfty/bmb15/bmb15toc.htm.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government make any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

Use Restrictions:

This material is distributed for internal research, non-commercial purposes only. This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale. This material may be subject to third party rights (US Patent 5,985,285).
