

Monoclonal Anti-Dengue Virus Type 1 Envelope Protein, Clone E33 (produced *in vitro*)

Catalog No. NR-4755

For research use only. Not for human use.

Manufacturer:

NIH Biodefense and Emerging Infections Research Resources Repository, NIAID, NIH

Product Description:

Antibody Class: IgG1κ*

Mouse monoclonal antibody prepared against the envelope glycoprotein of dengue virus type 1 (DEN-1) was purified from clone E33 hybridoma supernatant by protein G affinity chromatography. The B cell hybridoma was generated by the fusion of P3X63.Ag.8.6.5.3 BALB/c mouse myeloma cells with immunized mouse splenocytes. The clone E33 antibody is reported to bind to domain I-II in the envelope glycoprotein.¹

*The isotype of the clone E33 hybridoma is reported to be IgG1¹. However, NR-4755 also contains a trace amount of IgG2b.

Material Provided:

Each vial of NR-4755 contains approximately 100 µL of purified monoclonal antibody in PBS. The concentration, expressed as mg per mL, is shown on the Certificate of Analysis.

Packaging/Storage:

NR-4755 was packaged aseptically in screw-capped plastic cryovials and is provided frozen on dry ice. NR-4755 should be stored at -20°C or colder immediately upon arrival. Freeze-thaw cycles should be avoided.

Functional Activity:

NR-4755 is reactive by ELISA using DEN-1-infected cell lysates (DEN-1, Hawaii; BEI Resources NR-82). The antibody is reported to have neutralizing activity and to be reactive using flow cytometry.¹

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following

publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 5th ed. Washington, DC: U.S. Government Printing Office, 2007; see www.cdc.gov/od/ohs/biosfty/bmbl5/bmbl5toc.htm.

Citation:

Acknowledgment for publications should read "The following reagent was obtained through the NIH Biodefense and Emerging Infections Research Resources Repository, NIAID, NIH: Monoclonal Anti-Dengue Virus Type 1 Envelope Protein, Clone E33 (produced *in vitro*), NR-4755."

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.
