

***Francisella tularensis* subsp. *novicida*, Strain ΔIglC**

**Catalog No. NR-9711**

**Product Description:** *Francisella tularensis* (*F. tularensis*) subsp. *novicida*, strain ΔIglC is a transposon mutant of the wild-type strain U112, in which the *iglC* gene region has been replaced with a mini-Tn5 insert, rendering it resistant to kanamycin.

**Lot<sup>1</sup>: 58627619**

**Manufacturing Date: 20JUN2009**

<sup>1</sup>*F. tularensis* subsp. *novicida*, strain ΔIglC was deposited by Francis E. Nano, Ph.D., Department of Biochemistry and Microbiology, University of Victoria, Victoria, British Columbia, Canada. NR-9711 was produced by inoculation of the deposited material into Brain Heart Infusion Broth and grown 24 hours at 37°C. Broth inoculum was added to Chocolate agar Kolles which were grown 24 hours at 37°C to produce this lot.

<sup>2</sup>24 hours at 37°C on chocolate agar (GC agar)
