

Haemophilus sp., Oral Taxon 851, Strain F0397

Catalog No. HM-469

Product Description: *Haemophilus* sp., oral taxon 851, strain F0397 was isolated from a human oral cavity.

Lot^{1,2}: 60190847

Manufacturing Date: 16SEP2011

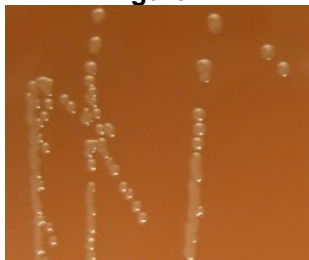

TEST	SPECIFICATIONS	RESULTS
Phenotypic Analysis Cellular morphology Colony morphology ³	Report results Report results	Gram-negative rod Circular, raised, entire and glistening (Figure 1)
Genotypic Analysis Sequencing of 16S ribosomal RNA gene (~ 1400 base pairs)	≥ 99% identical to GenBank: HM596277 (<i>Haemophilus</i> sp., oral taxon 851, strain F0397)	≥ 99% identical to GenBank: HM596277 (<i>Haemophilus</i> sp., oral taxon 851, strain F0397)
Viability (post-freeze)³	Growth	Growth

¹Quality control of HMP material is only performed to demonstrate that the material distributed by BEI Resources is identical to the deposited material. It should not be considered a complete characterization of the deposited organism.

²*Haemophilus* sp., oral taxon 851, strain F0397 was deposited by Jacques Izard, Assistant Member of the Staff, Department of Molecular Genetics, The Forsyth Institute, Boston, Massachusetts. The deposited material was inoculated into *Haemophilus* Test Medium and incubated for 24 hours at 37°C in an aerobic atmosphere with 5% CO₂. Broth inoculum was added to Kolles which were grown 24 hours at 37°C to produce this lot.

³48 hours at 37°C and 5% CO₂ on Chocolate Agar (GC Medium)
