

***Helicobacter pylori* Gateway[®] Clone Set, Recombinant in *Escherichia coli*, Plate 2**

Catalog No. NR-19478

This reagent is the tangible property of the U.S. Government.

Product Description: The *Helicobacter pylori* (*H. pylori*) Gateway[®] clone set consists of approximately 1600 sequence validated clones from *H. pylori* cloned in *Escherichia coli* (*E. coli*) DH10B-T1 cells.

Note: Production in the 96-well format has increased risk of cross-contamination between adjacent wells. Individual clones should be purified (e.g. single colony isolation and purification using good microbiological practices) and sequence-verified prior to use. BEI Resources cannot confirm or validate any clone not identified on the plate information table found on the Product Information Sheet.

Lot¹: 61074536

Manufacturing Date: 17JUL2012

TEST	SPECIFICATIONS	RESULTS
Direct Sequencing of an Entry Vector Clone (Well A04)	Confirmation of plate orientation Confirmation of clone identity	Orientation confirmed Clone identity confirmed
Viability (post-freeze)¹	Report results	Growth from inoculated wells
Purity (post-freeze)¹	Report results	Wells with growth exhibit single colony type consistent with <i>E. coli</i>

¹All plates incubated 24 hours at 37°C and aerobic atmosphere on Luria Bertani agar with 50 µg/mL kanamycin

Date: 23 OCT 2012
