

**Macrophage Cell Line Derived from TLR3 Knockout Mice**

**Catalog No. NR-19974**

This reagent is the property of the U.S. Government.

**Product Description:** This murine macrophage cell line was derived using primary bone marrow cells from TLR3 knockout mice. The macrophage cells were immortalized by infection with the ecotropic transforming replication-deficient retrovirus J2 using techniques described in the literature.

**Lot: 60243377**

**Manufacturing Date: 03MAY2012**
