Cryptococcus neoformans, Isolate 9

Catalog No. NR-41299

For research use only. Not for human use.

Contributor:
Qiang Qiang Zhang, Professor, Huashan Hospital, Fudan University, Shanghai, China

Manufacturer:
BEI Resources

Product Description:
Classification: Filobasidiaceae, Cryptococcus
Species: Cryptococcus neoformans
Isolate: 9
Original Source: Cryptococcus neoformans (C. neoformans), isolate 9 was obtained from human cerebrospinal fluid in China in August 2009.¹

The Cryptococcus species complex is currently composed of two species, C. neoformans and C. gattii. These species are best recognized as the agents of cryptococcosis, an AIDS-defining illness.² ³ C. neoformans is divided into two varieties, C. neoformans var. grubii (serotype A) and C. neoformans var neoformans (serotype D).² In the current classification scheme, there are five distinct lineages, referred to as VNI, VNII, VNB, VNIII and VNIV.²³ The two varieties (neoformans and grubii) are able to recombine and produce diploid or aneuploid intervarietal AD hybrids.² C. neoformans has been widely associated with avian excreta.²

Material Provided:
Each vial of NR-41299 contains approximately 0.4 mL of yeast culture in 20% glycerol.

Note: If homogeneity is required for your intended use, please purify prior to initiating work.

Packaging/Storage:
NR-41299 was packaged aseptically in cryovials and is provided frozen on dry ice. The product should be stored at -60°C or colder. For long term storage, cryogenic temperature (-130°C or colder), preferably in the vapor phase of a liquid nitrogen freezer, is recommended.

Growth Conditions:
Media:
Yeast Mold broth or equivalent
Yeast Mold agar or equivalent
Incubation:
Temperature: 25°C to 30°C
Atmosphere: Aerobic

Propagation:
1. Keep vial frozen until ready for use; thaw rapidly in a waterbath at 25°C to 30°C. Typically, this takes less than 5 minutes.
2. Immediately after thawing, inoculate an agar plate with approximately 40 µL of thawed culture or transfer the entire thawed aliquot into a single tube of broth.
3. Incubate the plate or tube at 25°C to 30°C for 2 to 4 days.

Citation:
Acknowledgment for publications should read "The following reagent was obtained through BEI Resources, NIAID, NIH: Cryptococcus neoformans, Isolate 9, NR-41299."

Biosafety Level: 2

Disclaimers:
You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.
