

Certificate of Analysis for HM-888

Streptococcus sp., Strain AS20

Catalog No. HM-888

Product Description: Streptococcus sp., strain AS20 is a human oral cavity isolate.

Lot^{1,2}: 63529437 Manufacturing Date: 11JUN2015

TEST	SPECIFICATIONS	RESULTS
Phenotypic Analysis		
Cellular morphology	Gram-positive cocci	Gram-positive cocci
Colony morphology ³	Report results	Circular, convex, entire, rough and cream (Figure 1)
Motility (wet mount)	Report results	Non-motile
Genotypic Analysis Sequencing of 16S ribosomal RNA gene (~ 1450 base pairs)	≥ 99% identical to GenBank: JANS01000016.1 (<i>Streptococcus</i> sp., strain AS20)	≥ 99% identical to GenBank: JANS01000016.1 (<i>Streptococcus</i> sp., strain AS20)
Purity (post-freeze) ⁴	Growth consistent with Streptococcus sp.	Growth consistent with Streptococcus sp.
Viability (post-freeze) ³	Growth	Growth

Quality control of HMP material is only performed to demonstrate that the material distributed by BEI Resources is identical to the deposited material. It should not be considered a complete characterization of the deposited organism.

⁴Purity of this lot was assessed for 7 days on Brain Heart Infusion agar in an aerobic atmosphere with 5% CO₂.

Date: 29 JUL 2015 Signature:

BEI Resources Authentication

ATCC[®], on behalf of BEI Resources, hereby represents and warrants that the material provided under this certificate has been subjected to the tests and procedures specified and that the results described, along with any other data provided in this certificate, are true and accurate to the best of ATCC[®]'s knowledge.

²Streptococcus sp., strain AS20 was deposited by Maria V. Sizova, Ph.D., Department of Biology, Northeastern University, Boston, Massachusetts, USA. HM-888 was produced by inoculation of the deposited material into Brain Heart Infusion broth and incubated for 1 day at 37°C in an aerobic atmosphere with 5% CO₂. Broth inoculum was added to Brain Heart Infusion agar kolles which were grown for 1 day at 37°C in an aerobic atmosphere with 5% CO₂ to produce this lot.

³1 day at 37°C on Brain Heart Infusion agar in an aerobic atmosphere with 5% CO₂
