

Vector Containing the Fructose-Bisphosphate Aldolase Gene Fragment from *Schistosoma haematobium*, Recombinant in *Escherichia coli*

Catalog No. NR-49842

This reagent is the tangible property of the U.S. Government.

Product Description: NR-49842 is the fructose-bisphosphate aldolase (FBA) gene fragment from *Schistosoma haematobium* (*S. haematobium*), cloned into Gateway® Entry Vector pDONR™222, recombinant in *Escherichia coli*.

Lot^{1,2}: 63725316

Manufacturing Date: 20JUL2015

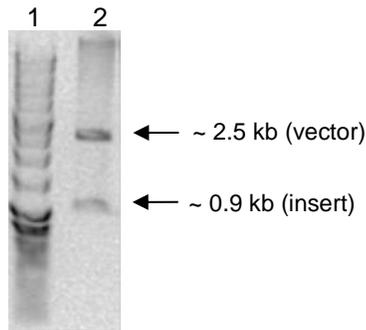

TEST	SPECIFICATIONS	RESULTS
Agarose Gel Electrophoresis Digestion with <i>BsrG</i> I ³	~ 0.9 kilobase pairs (insert); ~ 2.5 kilobase pairs (vector)	~ 0.9 kilobase pairs; ~ 2.5 kilobase pairs (Figure 1)

¹QC testing was performed by the Biomedical Research Institute, Rockville, Maryland (NIH-NIAID Contract HHSN2722010000051).

²Plasmid DNA was extracted from overnight bacterial culture in Luria-Bertani (LB) broth with 50 µg/mL kanamycin, using a commercially available kit.

³2 µg of DNA was digested with *BsrG* I for one hour at 37°C.
