

***Staphylococcus hominis*, Strain VCU122**

**Catalog No. NR-46399**

**For research use only. Not for human use.**

**Contributor:**

Network on Antimicrobial Resistance in *Staphylococcus aureus* (NARSA), NIAID, NIH

**Manufacturer:**

BEI Resources

**Product Description:**

Bacteria Classification: *Staphylococcaceae*, *Staphylococcus*

Species: *Staphylococcus hominis*

Strain: VCU122

NARSA Catalog Number: NRS871

Original Source: *Staphylococcus hominis* (*S. hominis*), strain VCU122 is of unknown origin.<sup>1</sup>

Comments: The complete genome sequence of *S. hominis*, strain VCU122 is available (GenBank: [AHLD00000000](https://www.ncbi.nlm.nih.gov/nuccore/AHLD00000000)).

*S. hominis* is a Gram-positive, non-motile, coagulase-negative staphylococci (CoNS) that is a commensal resident of human skin covering the axillae, head, legs and arms. It is also an opportunistic pathogen in immunocompromised patients and neonates and has been associated as the causal agent of bacteremia, septicemia and endocarditis.<sup>2-4</sup> *S. hominis* is subspeciated into *S. hominis*, subsp. *hominis* and *S. hominis*, subsp. *novobiosepticus* based on the combined characteristics of novobiocin resistance and failure to produce acid aerobically from D-threhalose and N-acetyl-D-glucosamine in *S. hominis*, subsp. *novobiosepticus*.<sup>5</sup> The two subspecies also differ in the presence and type of SCC*mec* cassette they carry. The majority of *S. hominis*, subsp. *novobiosepticus* isolates have SCC*mec* cassette components similar to the ones found in *S. aureus*, whereas only a small subset of *S. hominis*, subsp. *hominis* isolates carry a SCC*mec* cassette and there is a larger diversity of SCC*mec* components.<sup>6</sup>

**Material Provided:**

Each vial contains approximately 0.5 mL of bacterial culture in Tryptic Soy broth supplemented with 10% glycerol.

Note: If homogeneity is required for your intended use, please purify prior to initiating work.

**Packaging/Storage:**

NR-46399 was packaged aseptically in cryovials. The product is provided frozen and should be stored at -60°C or colder immediately upon arrival. For long-term storage, the vapor phase of a liquid nitrogen freezer is recommended. Freeze-thaw cycles should be avoided.

**Growth Conditions:**

Media:

Brain Heart Infusion broth or Tryptic Soy broth or equivalent

Brain Heart Infusion agar or Tryptic Soy agar or Tryptic Soy agar with 5% defibrinated sheep blood or equivalent

Incubation:

Temperature: 37°C

Atmosphere: Aerobic

Propagation:

1. Keep vial frozen until ready for use, then thaw.
2. Transfer the entire thawed aliquot into a single tube of broth.
3. Use several drops of the suspension to inoculate an agar slant and/or plate.
4. Incubate the tube, slant and/or plate at 37°C for 1 day.

**Citation:**

Acknowledgment for publications should read “The following reagent was provided by the Network on Antimicrobial Resistance in *Staphylococcus aureus* (NARSA) for distribution by BEI Resources, NIAID, NIH: *Staphylococcus hominis*, Strain VCU122, NR-46399.”

**Biosafety Level: 2**

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 5th ed. Washington, DC: U.S. Government Printing Office, 2009; see [www.cdc.gov/biosafety/publications/bmbl5/index.htm](http://www.cdc.gov/biosafety/publications/bmbl5/index.htm).

**Disclaimers:**

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at [www.beiresources.org](http://www.beiresources.org).

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product.
