

**Influenza A Virus, A/WSN/33 (H1N1)
PA-2A-NLuc (PASTN)**

Catalog No. NR-49383

For research use only. Not for human use.

Contributor:

Andrew Mehle, Ph.D., Department of Medical Microbiology and Immunology, University of Wisconsin-Madison, Madison, Wisconsin, USA

Manufacturer:

BEI Resources

Product Description:

Virus Classification: *Orthomyxoviridae, Influenzavirus A*

Species: Influenza A virus

Strain: A/WSN/33 (H1N1) PA-2A-NLuc (PASTN)

Comments: Influenza A virus, A/WSN/33 (H1N1) PA-2A-NLuc (PASTN) is a replication-competent influenza reporter virus that carries the luciferase variant NanoLuc® (NLuc) fused to the viral polymerase subunit A (PA). The reporter virus replicates with near-native properties both *in vitro* and *in vivo* and has pathogenicity and lethality in mice that is indistinguishable from the parental virus. It is suitable for use in *in vivo* imaging studies.¹

Material Provided:

Each vial contains approximately 1 mL of cell lysate and supernatant from Madin-Darby Canine Kidney (MDCK) cells (ATCC® CCL-34™) infected with influenza A virus, A/WSN/33 (H1N1) PA-2A-NLuc (PASTN).

Note: If homogeneity is required for your intended use, please purify prior to initiating work.

Packaging/Storage:

NR-49383 was packaged aseptically in screw-capped plastic cryovials. The product is provided frozen and should be stored at -60°C or colder immediately upon arrival. For long-term storage, the vapor phase of a liquid nitrogen freezer is recommended. Freeze-thaw cycles should be avoided.

Growth Conditions:

Host: MDCK cells (ATCC® CCL-34™)

Growth Medium: Eagle's Minimum Essential Medium supplemented with 0.125% bovine serum albumin and 1.0 µg/mL L-1-tosylamido-2-phenylethyl chloromethyl ketone (TPCK)-treated trypsin

Infection: Cells should be 80 % to 100% confluent

Incubation: 2 to 7 days at 37°C and 5% CO₂

Cytopathic Effect: Cell rounding and detachment

Citation:

Acknowledgment for publications should read "The following

reagent was obtained through BEI Resources, NIAID, NIH: Influenza A Virus, A/WSN/33 (H1N1) PA-2A-NLuc (PASTN), NR-49383."

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 5th ed. Washington, DC: U.S. Government Printing Office, 2009; see www.cdc.gov/biosafety/publications/bmb15/index.htm.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. C and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

Use Restrictions:

This material is distributed for internal research, non-commercial purposes only. This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale.

Note: Use of NR-49383 is subject to the terms of the Limited Use Label License for NanoLuc® Products. You may use this product for research use only; no commercial use is allowed. Commercial use means any and all uses of this product or derivatives by a party in exchange for consideration, including, but not limited to, (1) use in further product manufacture; (2) use in provision of services, information or data; and (3) resale of the product or its derivatives, whether

or not such product or derivatives are resold for use in research. Users shall have no right to modify or otherwise create variations of the nucleotide sequence of the luciferase gene contained in NR-49383. No other use or transfer of this product or derivatives is authorized without the prior express written consent of Promega Corporation.

In addition, users of NR-49383 must (1) use Nano-Glo®-branded luminescent assay reagents (LARs) manufactured by Promega and sold by ATCC® within a complete assay kit or sold by Promega as stand-alone LARs for all determinations of luminescence activity of this product and its derivatives, or (1a) contact Promega to obtain a license for use of the luciferase gene contained in this product and its derivatives.
