

Macrophage Cell Line Derived from TRIF Knockout Mice

Catalog No. NR-9566

This reagent is the property of the U.S. Government.

Product Description: The murine macrophage cell line, NR-9566, was derived using primary bone marrow cells from TRIF (toll-interleukin-1 receptor-domain-containing-adaptor-inducing interferon- β) knockout mice. The primary bone marrow cells were immortalized by infection with the ecotropic transforming replication-deficient retrovirus J2 using techniques described in the literature.
