

**Macrophage Cell Line Derived from TRAM Knockout Mice**

**Catalog No. NR-9567**

This reagent is the property of the U.S. Government.

**Product Description:** The murine macrophage cell line, NR-9567, was derived using primary bone marrow cells from TRAM (TRIF-related adaptor molecule: TRIF: toll-interleukin-1 receptor domain-containing adaptor-inducing interferon-β) knockout mice. The primary bone marrow cells were immortalized by infection with the ecotropic transforming replication-deficient retrovirus J2 using techniques described in the literature. Characterization based on immunofluorescence, stimulation assays and flow cytometry demonstrated that the immortalized cell line retains its macrophage-specific morphological, functional and surface expression properties.
