

Microglial Cell Line Derived from Wild Type Mice

Catalog No. NR-9460

This reagent is the property of the U.S. Government.

Product Description: The murine microglial cell line, NR-9460, was derived using brain tissue from wild type mice. The microglial cells were immortalized by infection with the ecotropic transforming replication-deficient retrovirus J2 using techniques described in the literature. Characterization based on immunofluorescence, stimulation assays and flow cytometry demonstrated that the immortalized cell line retains its microglial-specific morphological, functional and surface expression properties.

Lot: 58113833

Manufacturing Date: 06JUN2008

TEST	SPECIFICATIONS	RESULTS
Growth Properties	Adherent	Adherent
Morphology by Immunofluorescence¹	Microglial	Microglial
Surface Marker Expression by Flow Cytometry Using Specific Antibodies¹ CD11b F4/80 MHCII GFAP (astrocyte marker)	Characteristic of microglial cells Positive Positive Positive Negative	Characteristic of microglial cells Positive Positive Positive Negative
Multiplex PCR Amplification of Cytochrome C Oxidase I (COI) Gene	Murine origin No evidence of another species	Murine origin No evidence of another species
Total Cell Count	> 1.0 X 10 ⁶ cells/vial	3.9 X 10 ⁶ cells/vial
Post-Freeze Viability	≥ 50%	91%
Sterility (BacT/ALERT[®] 3D Microbial Detection System) 14-day incubation of NR-9460: i NST culture bottle, 32°C, anaerobic i AST culture bottle, 32°C, aerobic	No growth No growth	No growth No growth
Mycoplasma Contamination Hoechst DNA stain Agar and broth culture (14-day incubation at 37°C) DNA Detection by PCR of Test Article nucleic acid	None detected None detected None detected	None detected None detected None detected

¹Performed on immortalized cell line prior to growth of this distribution lot.
