

# Macrophage Cell Line Derived from IRF3 Knockout Mice

## Catalog No. NR-15635

This reagent is the property of the U.S. Government.

**Product Description:** This murine macrophage cell line was derived using primary bone marrow cells from IRF3 (interferon regulatory factor 3) knockout mice. The macrophage cells were immortalized by infection with the ecotropic transforming replication-deficient retrovirus J2 using techniques described in the literature.
