

Addendum to registration agreement for the BEI Material Transfer Agreement (MTA)

Applicable to Delamanid (NR-51636)

Recipient agrees that delamanid, donated to BEI Resources, will only be used for in vitro studies of mycobacteria drug susceptibility testing, in vitro pharmacokinetic/pharmacodynamic studies including the Hollow Fiber System (HFS) and/or animal studies of mycobacterial infection models.

The Recipient is responsible for adhering to the terms of the Material Transfer Agreement (MTA) with BEI Resources which was signed upon registering with BEI Resources. By signing below, the Recipient acknowledges they will abide by the terms of the MTA which includes a restriction on commercial use. The recipient will not use or incorporate the reagent for commercial purposes.
