

***Gardnerella vaginalis*, Strain JCP7672**

**Catalog No. HM-1108**

**Product Description:**

*Gardnerella vaginalis* (*G. vaginalis*), strain JCP7672 was isolated in February 2011 from a clinical vaginal swab collected from a woman that tested negative for bacterial vaginosis (Nugent score = 3) in Missouri, USA. HM-1108 lot 70031759 was produced by the inoculation of the BEI Resources seed lot into NYC III broth and incubated for 3 days at 37°C in an anaerobic atmosphere (< 5% O<sub>2</sub>; Remel™ Pack-Anaero™). The material from the initial growth was passaged once in NYC III broth for 2 days at 37°C in an anaerobic atmosphere to produce this lot.

Note: Quality control of HMP material is only performed to demonstrate that the material distributed by BEI Resources is identical to the deposited material. It should not be considered a complete characterization of the deposited organism.

**Lot: 70031759**

**Manufacturing Date: 22JAN2020**

TEST	SPECIFICATIONS	RESULTS
<b>Phenotypic Analysis</b> Cellular morphology Colony morphology 3 days at 37°C in an anaerobic atmosphere on Chocolate agar Motility (wet mount)	Gram-variable rods <sup>1</sup> Report results  Report results	Gram-variable rods Circular, convex, entire, smooth and gray (Figure 1)  Non-motile
<b>Genotypic Analysis</b> Sequencing of 16S ribosomal RNA gene (~ 1210 base pairs)	≥ 99% sequence identity to <i>G. vaginalis</i> , strain JCP7672 (GenBank: ATJP01000147.1)	99.8% sequence identity to <i>G. vaginalis</i> , strain JCP7672 (GenBank: ATJP01000147.1)
<b>Purity (post-freeze)</b> Anaerobic 7 days at 37°C on Tryptic Soy agar with 5% defibrinated sheep blood Aerobic with 5% CO <sub>2</sub> 7 days at 37°C on Tryptic Soy agar with 5% defibrinated sheep blood	Growth consistent with expected colony morphology  No growth	Growth consistent with expected colony morphology  No growth
<b>Viability (post-freeze)</b> 3 days at 37°C in an anaerobic atmosphere on Chocolate agar	Growth	Growth

<sup>1</sup>*G. vaginalis* is often described as a Gram-variable organism but has a thin, Gram-positive cell wall [see Harper, J. J. and G. H. G. Davis. "Cell Wall Analysis of *Gardnerella vaginalis* (*Haemophilus vaginalis*).” *Int. J. Syst. Bacteriol.* 32 (1982): 48-50].
