

Plasmid pUC19 Containing cDNA from Enterovirus D68, US/MO/14-18949, Infectious Clone pUC-49130

Catalog No. NR-52010

For research use only. Not for human use.

Raul Andino, Professor, Department of Microbiology and Immunology, University of California San Francisco, San Francisco, California, USA

Manufacturer:

BEI Resources

Product Description:

Enterovirus species D type 68 (EV-D68), US/MO/14-18949 (GenBank: [KM851227](#)) genome was cloned into the *Escherichia coli* (*E. coli*) cloning vector pUC19 to generate plasmid pUC-49130.¹ pUC-49130 contains a T7 bacteriophage promoter immediately upstream of the 5' end of the viral genome. Transfection of rhabdomyosarcoma cells with RNA transcribed *in vitro* from *Sall*-linearized plasmid results in production of infectious virus particles.¹ pUC-49130 also contains the beta-lactamase gene to provide transformant selection through ampicillin resistance in *E. coli*. The resulting size of the plasmid is approximately 10,122 base pairs.¹ The complete plasmid sequence is provided on the BEI Resources webpage. The plasmid was produced in *E. coli* and extracted.

NR-52010 has been qualified for use in bacterial transformations

Material Provided:

Each vial contains approximately 100 µL of plasmid DNA in TE buffer (10 mM Tris-HCl, 1 mM EDTA, pH 8.0). The DNA concentration and content are shown on the Certificate of Analysis. The vial should be centrifuged prior to opening.

Note: The contents of the vial should be used to amplify the plasmid in *E. coli* prior to mammalian expression.

Packaging/Storage:

NR-52010 was packaged aseptically in screw-capped plastic cryovials. The product is provided frozen on dry ice and should be stored at -20°C or colder immediately upon arrival. Freeze-thaw cycles should be minimized.

Citation:

Acknowledgment for publications should read "The following reagent was obtained through BEI Resources, NIAID, NIH: Plasmid pUC19 Containing cDNA from Enterovirus D68, US/MO/14-18949, Infectious Clone pUC-49130, NR-52010."

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services,

Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. *Biosafety in Microbiological and Biomedical Laboratories*. 5th ed. Washington, DC: U.S. Government Printing Office, 2009; see www.cdc.gov/biosafety/publications/bmbl5/index.htm.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy.
