

Mycobacterium leprae* Phenolic Glycolipid-I (PGL-I)*Catalog No. NR-19342**

This reagent is the tangible property of the U.S. Government.

Product Description:

NR-19342 is a preparation of the phenolic glycolipid-I (PGL-I) of *Mycobacterium leprae* (*M. leprae*) extracted from infected armadillo liver and spleen tissue. Crude lipids were obtained from chloroform:methanol (2:1) extraction of tissues and eluted on a silica gel column followed by preparative thin layer chromatography. The fractions containing PGL-I were pooled in chloroform:methanol (2:1) and dried under a nitrogen bath.

Note: PGL-I has a glassy appearance and can be difficult to observe in the glass vial.
