### DATA SHEET

<b>Reagent:</b>	Anti-HIV-1 IIIB Nef Monoclonal (AG11)
<b>Catalog Number:</b>	1124
<b>Lot Number:</b>	130080
<b>Release Category:</b>	D
<b>Provided:</b>	100 $\mu$ L purified antibody (1 mg/mL) in 0.02M Phosphate Buffer, 0.25M NaCl, 0.1% Na Azide, pH 7.6.
<b>Description:</b>	AE6 and AG11 antibodies recognize IIIB Nef. The reactive epitope maps to the COOH terminus of the full length Nef protein. The mAb detects Nef as a single 27 kD band in Western blots. These antibodies do not recognize HIV-1 SF2 Nef.
<b>Host Site:</b>	Mouse
<b>Titer:</b>	ELISA (1:100,000) when tested against recombinant HIV-1 IIIB Nef. Western blot (1:1,000).
<b>Special Characteristics:</b>	<p>The critical binding residue is the N in the BRU C-terminal YFKNC sequence.</p> <p>Specificity: Reacts with Human. Reactivity with other species has not been confirmed.</p> <p>Applications: ELISA, immunofluorescence, Immunoprecipitation, Western Blotting, Immunohistochemistry</p> <p><b>Commercially available through Millipore Corporation, Cat# MAB899</b></p>
<b>Recommended Storage:</b>	Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
<b>Contributor:</b>	Dr. James Hoxie
<b>Isotype:</b>	IgG1, K
