DATA SHEET

Reagent:	☒ HIV-1 TZBD9/11 (01TZ_911) Virus
Catalog Number:	11257
Lot Number:	080010
Release Category:	C
Provided:	1 vial cell-free virus. TCID ₅₀ = 10 ^{2.0} . HIV-1 p24= 3.5 ng/mL.
Host Strain:	Human PBMCs.
Description:	<p>The International Panel of HIV-1 virus isolates representing six major globally prevalent strains of genetically and biologically characterized HIV-1 isolates (Brown, BK et al, <i>J Virology</i> 79(10): 6089, 2005) consists of ten viruses each from chronically infected individuals of clades A, B, C, D and circulating recombinant forms, CRF01_AE and CRF02_AG. The panel consists of 49 nonsyncytium-inducing virus isolates that use CCR5 as a major coreceptor and 11 syncytium-inducing isolates that use only CXCR4 or both co-receptors, and contains both neutralization-sensitive and resistant isolates. This collection provides an important resource for standardization of immunogenicity assessment in HIV-1 vaccine trials (see Table 1 for genetic and biological characterization of the 60 international HIV-1 isolates).</p> <p>This isolate is available individually, or as part of the HIV-1 60 International Isolate Panel (Cat #11412).</p> <p>Table 1. International panel of HIV-1 Isolates.</p>
Special Characteristics:	<p>Subtype/CRF: C Syncytium Induction: NSI Coreceptor: R5</p> <p>GenBank Accession No. AY253322</p>
Recommended Storage:	Liquid nitrogen

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
