DATA SHEET

Reagent:	Anti-Human APOBEC3F Polyclonal (#157)
Catalog Number:	11425
Lot Number:	8/06 (157)
Provided:	500 µL of purified antibody at 1.5 mg/mL in PBS
Host:	Chicken
Titer:	The user should determine the optimal concentration for any application.
Sterility:	Unknown
Description:	A chicken polyclonal antibody raised against a synthetic peptide (aa CYEVKTKGPSRPRLDAK) near the N-terminus of human APOBEC3F (NP_660341.2)
Special Characteristics:	This preparation was purified by affinity chromatography against the immunizing peptide. Isotype: IgY This polyclonal can be used for Western blot detection of recombinant APOBEC3F protein from *E. coli* or baculovirus, etc., at a 1:250-1:1000 dilution. This reagent will not easily detect human APOBEC3F derived from human cells by Western blot.
Recommended Storage:	Keep the reagent at 4°C for short term storage and at -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
Contributor:	Dr. Reuben S. Harris

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: Anti-Human APOBEC3F Polyclonal (#157) from Dr. Reuben Harris."
