DATA SHEET

Reagent:	Anti-HIV-1 gp120 Monoclonal (2909)
Catalog Number:	12141
Lot Number:	120204
Release Category:	E
Provided:	100 µg purified antibody, 3.47 µg/µL, in PBS buffer.
Description:	HIV-1 human antibody (2909), specific for the V2V3 quaternary neutralizing epitope (QNE), purified using protein A chromatography.
Host:	Human, EBV-transformed cells fused with heteromyeloma SHM-D33 cells.
Special Characteristics:	This antibody is directed against the V2V3 quaternary neutralizing epitope. This antibody potentially neutralizes SF162 virus (≤ 1.0 µg/ml). Not cross-reactive.
Recommended Storage:	Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
Contributor:	Dr. Susan Zolla-Pazner
Isotype:	IgG1 λ chain

NOTE:

Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: Anti-HIV-1 gp120 Monoclonal (2909) Cat #12141 from Dr. Susan Zolla-Pazner." Also include the reference cited above in any publications.

Corporate requests should be directed in writing to Dr. Susan Zolla-Pazner at the Icahn School of Medicine at Mount Sinai, One Gustave L. Levy Place, Box 1090, New York, NY 10029.

PLEASE NOTE: The contributor has requested to be informed at least two weeks before submitting a document for publication or making a public oral presentation of research results obtained from the use of this material, in writing or by providing a copy of the publication document.

Recipient must not use or incorporate the reagent for commercial purposes.
