DATA SHEET

Reagent:	Anti-HIV-1 gp120 Monoclonal (PGT126)
Catalog Number:	12344
Lot Number:	150101
Release Category:	E
Provided:	200 µg of purified antibody in PBS (200 µL @ 1 µg/µL)
Description:	A recombinant, broadly neutralizing monoclonal antibody (bnMAB) to HIV-1 gp120, specifically to the N332-centered oligomannose patch of the V3 loop.
Host:	Human
Titer:	The user should determine the optimal concentration for any application
Special Characteristics:	<p>This recombinant antibody was produced in a FreeStyle 293 expression system and purified by Protein A affinity chromatography. This antibody originates and was sequenced from an individual that had been infected with HIV-1 for at least three years, was clinically asymptomatic and was not receiving antiretroviral therapy at the time of donation.</p> <p>Please see the LANL HIV Molecular Database for more information.</p>
Recommended Storage:	Keep the reagent at 4°C for short term storage and at -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
Contributor:	IAVI
Isotype:	IgG ₁ λ

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
