DATA SHEET

Reagent: pAD17

Catalog Number: 12423

Lot Number: 130377

Release Category: C

Provided: 5 µg of dried purified DNA stabilized in DNASTable *PLUS*

Cloning Vector: pCR-XL-TOPO, Kanamycin resistance

Cloning Site: MluI and NotI

Host Strain: Stbl-2

Description: Full-length molecular clone of replication-competent HIV-1 subtype B provirus generated from single genome amplification-derived consensus sequence of transmitted/founder virus.

Special Characteristics: [Contributor provided sequence information](#)
[Plasmid map and sequence file lot 130377](#)

This reagent is currently being provided as dried purified DNA stabilized in DNASTable *PLUS*. Please see the notice for additional information and the protocol for reconstitution of dried DNA reagents. [Dried DNA Notice](#)

Recommended Storage: Keep the reagent at room temperature in a dry storage cabinet or in a moisture barrier bag.

Contributor: Dr. Beatrice Hahn
