DATA SHEET

Reagent: HIV-1 Z3678F Infectious Molecular Clone (SGA 14)

Catalog Number: 13270

Lot Number: 180017

Release Category: C

Provided: 5 µg of dried purified DNA stabilized in DNASTable *Plus*

Cloning Vector: pBluescript
Ampicillin resistant

Cloning Site: Ligation independent cloning
The size of the insert is 8,983 bp.

GenBank: [KR820371](#)

Host Strain: Plasmids can be propagated in STBL2 cells and grown at 37°C. Larger plasmids may benefit from growth at 30°C.

Description: A full length replication competent, infectious HIV-1 subtype C Z3678F molecular clone.

Special Characteristics: This construct is 12,800 bp including the insert.
The source of this molecular clone is derived from a chronically infected Zambian donor partner. This non-transmitted clone variant can be used for in vitro replication studies.
Transfection of 293T cells produces infectious virus.

This reagent is currently being provided as dried purified DNA stabilized in DNASTable

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.

Plus. Please see the notice for additional information and the protocol for reconstitution of dried DNA reagents. [Dried DNA Notice](#)

Recommended Storage: Keep the reagent at room temperature in a dry storage cabinet or in a moisture barrier bag.
