### DATA SHEET

**Reagent:** 412-D mAb Heavy Chain Expression Vector

**Catalog Number:** 13613

**Lot Number:** 200351

**Release Category:** C

**Provided:** 5 µg of dried purified DNA stabilized in DNASTable *Plus*

**Cloning Site:** Unknown

**Cloning Vector:** pBR322 based vector  
Ampicillin resistant

**Description:** A 412-D mAb heavy chain expression vector which can be used with the corresponding 412-D mAb light chain expression vector (cat# 13614) to produce the monoclonal antibody, 412-D.

**Special Characteristics:** This construct is approximately 6000 bp including the insert.  
This is a heavy chain expression vector for the broadly neutralizing antibody, 412-D.  
This plasmid can be used in conjunction with the complementary 412-D mAb light chain expression vector (cat# 13614) to produce the monoclonal antibody, 412-D.

Plasmids can be propagated in STBL2 cells and grown at 37°C. Larger plasmids may benefit from growth at 30°C. This construct may also be grown in other competent cells.  
This reagent is currently being provided as dried purified DNA stabilized in DNASTable *PLUS*. Please see the notice for additional information and the protocol for reconstitution of dried DNA reagents. [Dried DNA Notice](#)
