DATA SHEET

Reagent:	HIV-1 Consensus B V3 Cyclic Peptide
Catalog Number:	1837
Lot Number:	01
Provided:	1.0 mg, lyophilized.
Description:	This peptide includes the GPGR V3 crown as well as flanking sequences. The sequence is the same as cat# 1830 except that a cysteine was placed at either end to allow the peptide to be cyclic.
Sequence:	CKSIHIGPGRAFYTTGC-NH ₂
Purity:	97.67% by HPLC
Mass Found:	1808.1
Solubility:	Water
Special Characteristics:	See the table for the other V3 peptides. Table
Recommended Storage:	4-8°C
Contributor:	DAIDS, NIAID. Produced by Peptide & Protein Research.
NOTE:	Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, AIDS Program, NIAID, NIH: HIV-1 NA Consensus V3 Cyclic Peptide from the Division of AIDS, NIAID." Each peptide is limited to 1 aliquot per laboratory.
