### DATA SHEET

**Reagent:** ☒ HIV-1 92/RW/025 Virus

**Catalog Number:** 1949

**Lot Number:** 13-Dec-93

**Release Category:** D

**Provided:** 1 vial cell-free virus  
TCID<sub>50</sub> = 7.7 x 10<sup>3</sup>/mL  
p24 = 101 ng/mL

**Original Source:** Isolated from a heterosexual individual of unknown health status in Rwanda

**Host Strain:** Human PBMCs

**Propagation:** Procedures used to prepare viral stocks are provided at [http://www.aidsreagent.org/support\\_docs/virus.pdf](http://www.aidsreagent.org/support_docs/virus.pdf)

**Description:** Gag subtype A, Env subtype A. R5

**Special Characteristics:** Subtyping determined by sequencing a short sequence of the gag and/or env genes, or by HMA; thus, intersubtype recombinants may not have been detected in some cases.

**Contributor:** The UNAIDS Network for HIV Isolation and Characterization, and the DAIDS, NIAID.

**References:** WHO Network for HIV Isolation and Characterization. *AIDS Res Hum Retroviruses* **10**:1359, 1994.

---

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.

**NOTE:** **All scientists requesting this reagent with commercial intent must submit a WHO - UNAIDS Materials Transfer Agreement (MTA).**

Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: HIV-1 92/RW/025 Virus from The UNAIDS Network for HIV Isolation and Characterization."

**Required Form:** UNAIDS\_MTA.pdf

**Last Updated:** July 27, 2018
