DATA SHEET

Reagent: HIV-2_{ROD} Vpx Antiserum

Catalog Number: 2609

Lot Number: 94082

Provided: 200 µl undiluted antiserum.

Host or Host Site: Rabbit.

Titer: 1:200 for Western blots and immunoprecipitation.

Special Characteristics: Raised against a bacterially expressed Vpx protein (Catalog #504, from Repligen Corporation). Recognizes a 16 kD protein.

Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor: Dr. Lee Ratner, Washington University.

References: Horton R, Spearman P, Ratner L. HIV-2 viral protein X associated with the Gag p27 capsid protein. *Virology* **199**:453-457, 1994.

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: HIV-2_{ROD} Vpx Antiserum from Dr. Lee Ratner." Also include the references cited above in any publications.

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
