DATA SHEET

Reagent: Anti-HIV-1 gp120 Monoclonal (IgG1 b12)

Catalog Number: 2640

Lot Number: 140182

Release Category: E

Provided: 100 µg purified antibody in PBS at 1 mg/ml

Description: Obtained as a Fab fragment by selection against IIIB gp120 from an antibody phage display library prepared from bone marrow of a long term asymptomatic HIV-1 seropositive donor. IgG1 b12 was then expressed as a whole antibody in CHO cells in tissue culture.

Host: Human

Special Characteristics: Maps to the gp120 CD4 binding site. Protein A purified.

Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor: Dr. Dennis Burton and Carlos Barbas.

Isotype: IgG₁, κ chain.

NOTE:

Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: Anti-HIV-1 gp120 Monoclonal (IgG1 b12) from Dr. Dennis Burton and Carlos Barbas." Also include the references cited above in any publications.

Requests from commercial organizations should be directed to Dr. Dennis Burton, The Scripps Research Institute, Department of Immunology, 10666 North Torrey Pines Road, La Jolla, CA 92037.

Recipient must not use or incorporate the reagent for commercial purposes.
