DATA SHEET

Reagent: Mycobacterium avium Antigen 85B DNA (p Ag7)

Catalog Number: 2673

Lot Number: 1 10/2/94

Release Category: A

Provided: 2.5 µg plasmid DNA (dried).

Special Characteristics: Isolated from *M. avium* genomic DNA (Catalog #1786). Contains a 5.4 kb *EcoRI* insert, 1.2 kb of which encodes the antigen 85B protein.
Cloning Vector: pBluescript.

Recommended Storage: 4-8°C.

Contributor: DAIDS, NIAID. Produced by BioTechnology General.

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: *Mycobacterium avium* Antigen 85B DNA (p Ag7)."

Last Updated: June 21, 2013

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
