DATA SHEET

Reagent:	Normal Goat Purified IgG
Catalog Number:	3064
Lot Number:	ES231111
Provided:	200 µg
Description:	Serum was obtained from naive (non-immunized) goats. Normal IgG was purified by Protein G affinity chromatography.
Special Characteristics:	This product has been purified for use as normal goat IgG. In direct ELISA, this IgG preparation shows no reactivity with the cytokines tested. Commercially available at R&D Systems (Cat# AB-108-C)
Recommended Storage:	Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
Contributor:	DAIDS, NIAID
NOTE:	Acknowledgement for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: Normal Goat IgG."

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
