DATA SHEET

Reagent: Anti-Human CCR5 Monoclonal (45531)

Catalog Number: 4087

Lot Number: 098102

Release Category: A

Provided: 100 µg purified protein, resuspended in PBS.

Description: This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a Balb/c mouse inoculated with CC chemokine receptor 5 (hCCR5) transfected NSO mouse myeloma cells. The IgG fraction of ascities fluid was purified by Protein G affinity chromatography.

Host: Balb/c mouse.

Special Characteristics: This antibody was selected for ability to react in FACS specifically with human CCR5 transfectants. Also reacts with a CCR5/CCR2 chimera containing the 2nd extracellular loop of CCR5. Reacts with CCR5 on the surface of stimulated human PBMCs. Use at 5-10 µg/ml for flow cytometry. Can be used at 5-25 µg/ml for immunohistochemistry on cultured cells or tissue sections. Complete inhibition of cell-surface CCR5-mediated rhMIP-1α response occurs at 50 µg/ml antibody in the presence of 1.25 µg/ml rhMIP-1α.
Commerically available at R&D Systems (Cat# MAB182)

Recommended Storage: -70°C

Contributor: DAIDS, NIAID

Isotype: IgG_{2a}
