DATA SHEET

Reagent: EIAV Tat30 Antiserum

Catalog Number: 4201

Lot Number: 2 99080

Provided: 50 µl

Host or Host Site: Rabbit.

Titer: Use at 1:2000 for immunoblots.

Special Characteristics: Raised against the peptide YHCQLCFLRSLGIDYLDASLRKKNKQRLKA.

Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor: Dr. David Derse.

References: Carroll R, Derse D. Translation of equine infectious anemia virus bicistronic tat-rev mRNA requires leaky ribosome scanning of the tat CTG codon. *J Virol* **67**:1433-1440, 1993.

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: EIAV Tat30 Antiserum from Dr. David Derse." Also include the reference cited above in any publications.

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
