DATA SHEET

Reagent:	Anti-SIVmac gp120 Monoclonal (KK42)
Catalog Number:	4670
Lot Number:	170029
Release Category:	B
Provided:	1 mL culture supernatant
Description:	A monoclonal antibody to SIVmac251 gp120, specifically to V3 region (epitope: aa 321-340)
Host:	Mouse
Titer:	The user should determine the optimal concentration for any application.
Special Characteristics:	<p>This antibody was produced in cell culture. It originates from a hybridoma. The hybridoma was created by immunizing Balb/c mice with a SIVmac251 gp160 vaccinia recombinant (vAbT253), then boosting with glutaraldehyde-fixed SIVmac 11/88 from C8166 cells. The resulting splenocytes were fused to NS-O myeloma cells.</p> <p>KK42 is a non-neutralizing antibody. It recognizes SIV strains mac251, cyn186, sm7, and smm8670, but does not react with HIV-2 SBL Virus.</p> <p>Applications: Western blot, RIPA, IFA</p>
Recommended Storage:	Keep the reagent at 4°C for short term storage and at -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
Contributor:	Dr. Karen Kent and Caroline Powell (Produced by CFAR, NIBSC)
Isotype:	IgG ₁
