DATA SHEET

Reagent: Anti-Human CD4 Monoclonal (SIM.2)

Catalog Number: 723

Lot Number: 130162

Release Category: E

Provided: 1.0 ml culture supernatant.

Description: This antibody recognizes human CD4. It recognizes a different epitope than the Leu 3a antibody.

Host Site: CB6F1 mouse.

Titer: Detectable by ELISA using soluble CD4 at a dilution of 1:1000.

Special Characteristics: This antibody as well as SIM.4 (cat# 724) blocks HIV-induced syncytium formation. Antibodies were raised against Sup-T1 cells, and work in immunoprecipitation, immunofluorescence, and ELISA assays.

Endotoxin: 19.14 EU/mL* (Lot 6 060882)

*NOTE: Endotoxin has been shown to induce chemokines and other soluble HIV and SIV inhibitory factors in primary cultures of PBMC, monocytes and macrophages (Verani et al., J Exp Med 185:805-816, 1997; J Immunol 168:6388-6396, 2002; Montefiori in preparation). Thus, caution is advised when using this reagent for in vitro studies involving primary cells.

Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor: Dr. James E.K. Hildreth.

Isotype: IgG_{2b}, K

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
