DATA SHEET

Reagent: Anti-HIV-1 gp120 Monoclonal (654-30D)

Catalog Number: 7369

Lot Number: 080180

Release Category: E

Provided: 10 µL affinity purified antibody, at 3.33 µg/µL.

Host: Human (EBV transformed B cell fused with heteromyeloma SHM-D33).

Special Characteristics: This monoclonal antibody recognizes a discontinuous epitope on gp120 and its binding depends on the tertiary protein structure and intact carbohydrates (1). The epitope, though infrequently detected, is expressed on cells infected with various clades (2). Monoclonal antibody 654-30D blocks binding of soluble CD4 to recombinant gp120_{IIIB} (1) and neutralizes laboratory isolates IIIB and primary isolate BZ167 at 2 µg/ml (3, 4). Specific for CD4bd region of gp120.

Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor: Dr. Susan Zolla-Pazner.

Isotype: IgG₁, I.
