DATA SHEET

Reagent:	Anti-Human CXCR4 Monoclonal (44716)
Catalog Number:	4085
Lot Number:	140215
Release Category:	A
Provided:	100µg (1 mg/mL) purified protein, resuspended in PBS.
Description:	This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a Balb/c mouse inoculated with hCXCR4 transfected mouse 3T3 cells. The IgG fraction of the tissue culture supernatant was purified by Protein G affinity chromatography. CXCR4 is a G-protein-linked seven transmembrane spanning receptor that binds stromal cell-derived factor-1 (SDF-1). CXCR4 acts as a co-factor for T-cell trophic HIV-1 and -2 viral entry into cells.
Host:	Balb/c mouse splenocyte.
Special Characteristics:	<p>This antibody was selected for its ability to react specifically with human CXCR4 (fusin) expressed on human or non-human cells as detected by flow cytometry. It will also react with cells expressing feline CXCR4 but not rat CXCR4. This antibody does not cross-react with other chemokine receptors.</p> <p>Specificity: human CXCR4 (fusin)</p> <p>Applications: Neutralization of bioactivity, Flow cytometry, Immunohistochemistry</p> <p>Commerically available at R&D Systems Cat# MAB172</p>
Recommended Storage:	Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
Contributor:	DAIDS, NIAID
Isotype:	IgG _{2b}

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
